

# WEBCIS 4.0:

THROUGH MORE THAN 20 YEARS OF EXPERIENCE

# BEST-OF-BREED

## READY-TO-USE SOFTWARE SUITE TO CONTROL STRATEGIC PURCHASING

More than 20 years of experience have made WebCIS 4.0 mature into a shopping control suite that leaves nothing to be desired. More than 90% of all strategic purchasing questions are answered by our master analyses at the touch of a button. The Best-of-Breed concept of WebCIS 4.0 combines the experience and subject areas of more than 400 customers worldwide in one system. The system adjustments to the customer are made by Customizing and thus enable a fast product setting in a few weeks. The installations

are release-capable and therefore the customers automatically participate in the growing know-how. Customer-specific programming for special topics is the absolute exception, so long blueprint phases are largely unknown. The ready-to-use dashboards supplied by WebCIS 4.0, which are quickly and easily customizable to your own ideas, cover large parts of the reporting system and the most important fields of action. 360° product group and supplier control, KPI reports with a one-touch outline of the details, suggestions for action as PushForward News include the highest buyer's expertise, making WebCIS 4.0 an immediate benefit for every role owner.
