

MEASURES PURCHASING TASKS AND INITIATIVES MANAGEMENT

GET DOCUMENTED AND CONTROLLED BY WEBCIS 4.0

THE TRANSPARENCY THAT IS CREATED BY THE PURCHASING AND TOTAL SPEND ANALYSES IS NOW POSSIBLE TO IMPLEMENTATION OF THE RECOGNITION INTO OPERATIVE AND STRATEGIC DOING.

What are the tasks and purchasing targets in the near and distant future? How and by when will they be implemented and what are the tangible results?

Purchasing must be able to provide information about these at the push of a button in order to fulfil its role as an

important result driver in the company. A meaningful controlling of measures, which allows both management and reporting is an essential part of defining, planning, tracking and communicating projects and, as far as possible, comparing the planned results with the actual values. With WebCIS 4.0 Measure Controlling, which is embedded in the entire purchasing management suite, the user is based on the real data structures of the existing ERP systems. The selection of cornerstones of a measure corresponds to today's standard project management in practice.
